

UNI-COM
Circuit breaker
Model: 53637

Operating instructions

Directions for use

- (1) Plug the circuit breaker into the mains socket and switch on.
- (2) Press the green RESET button - a red indicator will appear to show that power to the circuit breaker is active (please note the red indicator is not a light).
- (3) Press the blue test (T) button - the unit will click and the red indicator will disappear to show that power to the circuit breaker has been cut.

This process tests to see if the circuit breaker is working properly before use.
Repeat everytime you use the circuit breaker.

- (4) Press the green RESET button to restore power to the circuit breaker and insert your appliance into the socket on the front of the unit.

The circuit breaker will monitor the flow of electricity and will cut the power when electricity "leaking" to earth is detected at a harmful level. The unit will click and the red indicator will disappear.

Reset the circuit breaker and try using your appliance again. If the circuit breaker cuts the power for a second time stop using the appliance immediately and have it inspected.

Specification
230V AC 50Hz
Max load: 13A
Trip time: < 30ms
Trip current: 15-30mA

Conforms to directive: BS 7071:1992

Safety warning

This product is not a toy. For indoor use only (operating temp: 0°C to 40°C). Do not plug in an appliance where the load exceeds 13 Amp. Always ensure the plug of any appliance is fully inserted into the circuit breaker. If cleaning of the circuit breaker is required, remove from the mains power and wipe unit with a dry cloth. Do not immerse in water or any other liquid. Do not use if the casing of the circuit breaker becomes cracked or damaged.

Guarantee

This product is guaranteed for one year from the date of purchase against faulty parts or workmanship.
It does not cover physical damage to the unit. Proof of purchase required. This does not affect your statutory rights.
