

PRODUCT OVERVIEW

Motion Detector Alarm

1

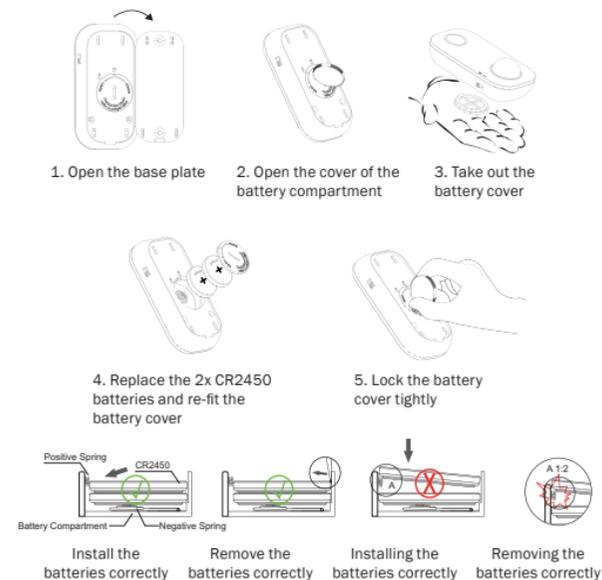

INSTALLATION

The Motion Detector Alarm comes with the batteries fitted and ready to use.

1. Remove the base plate from the alarm.
2. Using the adhesive tape supplied, mount the alarm base plate in the chosen location.
3. Refit the alarm to the base plate.
4. The base plate can also be attached using screws (not supplied) through the two holes in each base plate.
5. When changing the batteries in the alarm, simply remove the alarm from the base plate, open the battery cover using a coin or screwdriver and replace the two CR2450 button cell batteries.

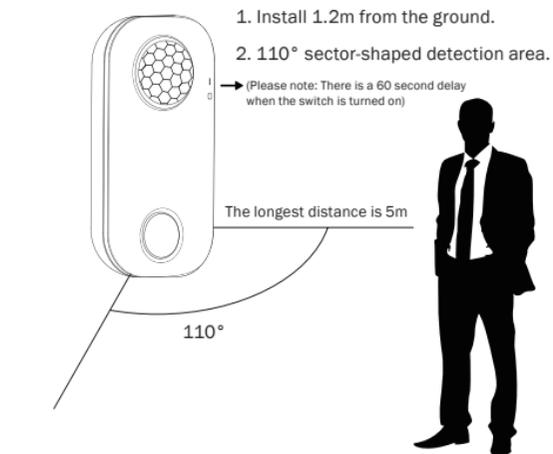

2

BATTERY REPLACEMENT

3

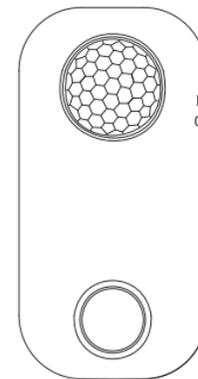

PRODUCT INSTRUCTIONS

Move the switch to the "I" position and the alarm has a 60 second exit delay time. After 60 seconds the alarm will be armed and if it detects body heat, the alarm will sound for 30 seconds, after which it will stop. The alarm can be switched off by moving the switch back to the "0" position.

4

PRODUCT SPECIFICATION

Size: 45x88x26mm

Model: UNC68716

Working Temperature: 0°C~35°C

Decibels: ≥90dB

Working voltage: 2x3V CR2450

5
